Scholastic Achievements

2017 **Academic Excellence Award**, Exceptional Performance in Freshmen Year

IIT, Kanpur

Work Experience

Google Summer of Code

ARTICLES, ROCKET.CHAT

Summer 2019

- Worked on two Open Source projects, Ghost(publishing platform) and Rocket.chat.
- Modified Ghost code to allow easy integration with Rocket.chat.
- Allows Rocket.Chat user to create account on Ghost with a simple redirect, and exploit all the features provided by Ghost.
- Implemented webhooks to keep both application database in sync.
- Added Ghost in Rocket.chat as a social feature for Rocket.chat users.

C3i Center, IIT Kanpur

DYNAMIC VERIFIABLE FREQUENCY BASED BILLING, UNDER PROF. SANDEEP SHUKLA

Kanpur, India

May. 2019 - July. 2019

- Implemented a frequency based pricing system for two-way distribution model between consumers and distributors.
- Implemented a private blockchain network using hyperledger fabric framework.
- Created a react based web application to simulate a day events in network.
- Worked on hyperledger explorer to monitor the changes in the network.

Leena AI

INTERN, APP DEVELOPER

Gurgaon, India

Dec. 2018

- Worked on a scalable cross-platform application, built using React Native framework.
- Built a Chat app from scratch where user can chat with multiple bots assisting them with their HR, IT, and other employee related queries.
- Integrated web-socket in the app for two-way communication between client and server.
- Added push notification service in app for notifying user about the updates on his/her query.

New York Office, IIT Kanpur

INTERN, UNDER PROF. MANINDRA AGARWAL

Kanpur, India

May. 2018 - July. 2018

- Worked on a scalable android application, designed in MVP architecture.
- Integrated editor in app to allow rich text editing, in different source type- Markdown, HTML and WYSIWYG.
- Created a detail fragment where user data can seen in brief, and can be redirected to user's profile.
- Improved UI/UX of the app by implementing features associated with menus, viewpagers, card views, preference layouts etc. adhering to Google's Material Design guidelines.
- Implemented linting and unit testing as part of development workflow.

Projects

Code.Fun.Do++

HACKATHON

Microsoft India

Sept'2018

- Developed an android app which helps to connect victims of any disaster event, with Disaster relief agencies.
- Used **Firebase tools** for creating serverless APIs and database.
- Used Firebase notification service for notification.

Relevant Courses

Introduction to Programming(A*)
Data Structures and Algorithms

Set Theory & Logic
Probability and Statistics

A*: Grade for exceptional performance

Positions of Responsibility

- Web Executive, Stamatics, IIT Kanpur 2018-19
- Academic Mentor, Counselling Service, IIT Kanpur 2019-19

Miscellaneous

- Contribute to Open Source projects like Rocket.chat
- Started an Open Source project for GSoC organizations to keep track of student's contribution for better selection criterion.
